Compliance Solutions

As you focus on managing the complexities of your compliance plan, it is important you collaborate to achieve continuous improvement. Panacea's experience and tools can help you target some of your biggest challenges.

Panacea can provide a variety of solutions to assist in meeting your goals:

- ☐ Auditing and compliance reviews
- ☐ Evaluate and develop your staff
- ☐ Professional (practitioner) risks analysis and auditing review
- ☐ Mine your claims data for proactive risk and compliance with CLAIMSauditor
- ☐ Pharmacy coding and compliance
- ☐ Expert witness support

Auditing and Compliance Reviews

Correct and compliant coding is critical in today's environment of regulations and scrutiny. Our holistic approach to auditing and compliance reviews evaluates your team and reviews records/case for compliance, then we collaborate on the next steps in your plan. Our focus is to help you and your team implement continuous improvement, not just to audit.

Evaluate and Develop Your Staff

You cannot continue to audit as usual in today's environment. One key tool we use is evaluation of your auditors or coders skill sets. Once completed, we deliver reports which guide our collaboration with you to determine the next steps.

Professional (Practitioner) Risks Analysis and Auditing Review

Auditing practitioners is required in most organizations, and it can seem overwhelming. Our new methodology uses evaluations, technology, expertise, and education. Our overarching goal is to determine the auditing/coding team's skills, understand the patterns and risk as well as opportunities, and help you implement plans to proactively manage the risk and deliver the right education.

Data Leading to Knowledge

Waiting for IT to deliver information on cases at risk or using cumbersome tools can be frustrating when you need to quickly determine if a large problem exists in your organization. Our CLAIMSauditor can empower your research. You can easily mine your data and turn it into knowledge on your risk.

Pharmacy Coding and Compliance

With the complexities of pharmacy data and scrutiny of pricing, a sole-source tool for all your pharmacy data—which can analyze the entire formulary and report on discrepancies and concerns—is essential to managing your pharmacy compliance.

Expert Witness Support

Many times, outside expertise is required. We provide special financial and clinical coding-related modeling to support to you and their legal defense teams on matters related to charges, utilization, and coding.

PANACEA ®
A Career Step Company

We help healthcare organizations improve their bottom line and strategic market position with front line expertise in revenue cycle management, smart software and enterprise-level educational solutions.
