

Financial Reporting and Analyses

Unit Cost Estimator™ System and Service

Establish cost-based prices (e.g., Hospital Zero-Base Pricing[®]) or upgrade your decision support system from use of the ratio-of-cost-to-charge (RCC) method without the financial and resource burden of implementing a full blown cost accounting system. Panacea can create a comprehensive schedule of estimated unit direct and fully allocated costs for most if not all items in your chargemaster with variable, semi-variable and fixed costs broken out.

Financial Modeling

Model the impact of proposed or final Medicare, Medicaid or Managed Care rules, rates or groupers, or the impact of changes in practice patterns, demographics, and more.

Financial Benchmarking

Comparative financial, statistical and utilization data based on customized peer groups. Individual or groups of hospitals can be compared to peer groups based on bed size, geographic location, degree of teaching, case-mix intensity level and more. Balance sheet, Profit and Loss, Operating Expense, Staffing, Competitiveness, Pricing and other analyses are included. Panacea's financial consulting experts will interpret the data and provide written results and recommendations.

Profitability and Clinical Management Reports

Without requiring a profitability management reporting or cost accounting system, Panacea can generate reports including but not limited to:

- Profitability by physician, payer, patient, product line, and procedure levels
- Profitability by cost center
- Profitability with consideration to severity of illness
- Resource utilization patterns (length of stay and ancillary utilization)
- Physician practice patterns (actual vs. expected)
- Clinical outcomes by quality indicator
