

## Comparative Health Data™

### Analyze peer pricing and utilization data with our Comparative Health Data™ system

Panacea provides the nation's first, easy-to-use and cost efficient solution for hospitals or consultants to develop unlimited customized peer comparison groups based on a claims and cost report representing more than 5,000 hospitals and more than 60,000 Physician medical office and freestanding facilities (e.g. imaging, ambulatory surgery, etc.).

With the Comparative Health Data™ system you will be able to compare:

- Hospital unit costs and prices to any single or group of hospitals nationwide
- Room & board rates and prices at the HCPCS/CPT level
- Charge-to-cost mark-up factors for operating room, medical supplies, implants, drugs and more
- Coding & pricing patterns
- Outpatient HCPCS coding differences between you and your peers

Print reports to the screen or export to Excel. Create and share files with other modules. For example, if you create one or more customized peer groups utilizing our Comparative Health Data™ system you will also be able to import the peer group data with one simple click for use in establishing new prices in our Hospital Zero-Base Pricing® module.
