

Continuous Coding Improvement Program

It is important to focus on improving your compliance, reimbursement, and coding accuracy. Panacea combines cloud-based technology with ongoing consulting and technical support to facilitate the initial and continued focused auditing of HIM-coded records to monitor and ensure continuous improvement in coding and clinical documentation.

Your hospital claims data is processed through Panacea's CLAIMSAuditor software to identify your gaps and improvement opportunities in coding and documentation. Your own data will be the foundation for our baseline audit using the system-selected records.

The baseline audit results are used for monitoring coding and documentation improvement and creating customized training programs and our team of consultants work directly with your physicians, and coding professionals, to remedy each area of weakness.

With Panacea you can:

- Reduce your compliance and reimbursement exposure from inaccurate coding and insufficient documentation
- Target your budget dollars on your unique areas of risk and opportunities
- Obtain complete medical record documentation to support quality care, patient acuity, accurate coding, and costs per patient
- Monitor hospital coding improvement by coder and benchmark against expected accuracy rates
- Use CLAIMSAuditor reports to trend physician documentation practices for customized education
- Reduce denials with upfront accurate coding
- Provide timely and consistent evaluation of issues for continuous improvement
- Ensure that your claim denials are reviewed and they are processed appropriately
- Use as quality assurance of your own processes to ensure appropriate reimbursement
- Develop customized training programs and monitor improvement
