

IR and Cardiovascular Procedures

Whether performed in the radiology suite, cardiac cath lab, or operating room, Interventional Radiology, Interventional Cardiovascular, and Electrophysiology (EP) procedures can be difficult areas to accurately code.

The sweeping coding changes that began in 2012 and continue today significantly add to the complexity. With so many departments involved in so many ways, chargemaster generated codes, HIM generated codes, and more... the likelihood of error is high. To add to the challenge, these procedures are now under even greater scrutiny for medical necessity.

Panacea experts have the industry knowledge to translate the paper trail left by these convoluted procedures into clear, actionable insights. You'll know if you are at risk and exactly what you need to do to mitigate it. Panacea will work with your multi-disciplinary team to reduce the identified error rate.

Key Benefits

- Understand the latest coding changes and concepts
- Appropriately capture revenue
- Reduce errors by producing clean claims upfront
- Ensure there are no inappropriate reimbursements
- Identify missing charges
- Link medical necessity of services with coding accuracy
- Reduce the potential of denials, fines and audits
- Assess your CDM / EMR / RIS system for accuracy
