Revenue Enhancement and Risk Reduction

CLAIMSauditor.com® is a cloud-based compliance and auditing tool that assists clinical, coding and financial professionals to uncover coding, compliance and reimbursement risks and opportunities hidden in their provider claims and other detail data.

Unlike EDI systems or "scrubbers," CLAIMSauditor.com® allows users to apply and create rules not typically found in such systems. The system facilitates a more cost efficient and effective focused review and audit approach.

With CLAIMSauditor.com®, You Will Be Able to:

• Query and select records for review

• Select from thousands of rules from our library or even design your own

• Choose those charts or claims having the highest probability for a coding, compliance, quality or billing discrepancy

• Use retrospectively or concurrently with the billing process

• Access data and develop reports without burdening IT

CLAIMSauditor.com® Uncovers:

• Lost charges

• Under and overpayments due to coding and/or documentation

• RAC audit targets

• Medical necessity targets

• CERT, MIC, MAC, PSC and OIG targets

• MCC/CC capture rates

• Unbilled services (lost charges)

• Underbilled services

• Quality issues
