

Are Payors Denying Your Claims Due to Missing HCPCS Codes for Supplies?

Is your Supply CDM up-to-date and properly managed? Are you effectively assigning HCPCS codes to avoid claim denials? Submitting claims without the correct HCPCS code can lead to denials, payment delays, and increased audit risk.

Key Challenges You Face:

- ✓ **Claim Denials:** Payers reject claims when supply/implant revenue codes (278, 274, 272) are billed without a valid HCPCS code.
- ✓ **Time-Consuming Research:** Assigning HCPCS codes to supplies often requires extensive time and effort.
- ✓ **Compliance Complexity:** Staying compliant with payer-specific rules and ensuring proper coding.

Why Accurate HCPCS Coding Matters:

- ✓ **Mandatory for Payment:** HCPCS codes are required to identify medical supplies and implants for proper claims processing HCPCS code.
- ✓ **Avoid Delays and Audits:** Claims without valid HCPCS codes risk denial, delayed payment, and potential audits.
- ✓ **Handle Special Cases:** Even unlisted items need "not otherwise classified" (NOC) codes with detailed documentation.

Panacea Has the Solution:

With a robust database of over **1 million supply and implant records**, Panacea streamlines HCPCS code assignments, saving you time and reducing denials.

Automated Matching: Match supplies using GUID or manufacturer numbers for fast, accurate coding.

Expert Assistance: Our consultants review unmatched items to identify appropriate HCPCS codes and ensure compliance.

Stop Losing Revenue to Avoidable Denials!

Let Panacea's cutting-edge tools and expert team clean up your Supply CDM, simplify HCPCS assignments, and help you get paid faster. Take control of your supply billing.
